**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

2. Figure 3 should be designated by a legend (in English) such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7 and 8 provides for the use of textile fibers and textiles, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 7 and 8 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1732

6. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oxenrider et al (U.S. Patent 3,899,563 A) in combination with Frey et al ("Fibres by Dry Spinning Processes").

Oxenrider et al (see the entire document, in particular, col. 1, lines 12-14 and 55-57; col. 1, line 68 to col. 2, line 19; col. 8, lines 33-68; col. 10, lines 8-14) teach a process of making a textile fiber having permanent repellant action as set forth in the instant claims, including mixing a polyacrylonitrile polymer with an ambivalent polymer with fluorocarbon groups as the repelling groups and with nitrile groups as the affine residual groups, except that Oxenrider et al do not explicitly teach solution (or dry) spinning the polyacrylonitrile polymer system, which is taught by Frey et al (see the entire document, in particular, pages 395, 397, 398 and 401) and would have been obvious to one of ordinary skill in the art at the time the invention was made principally in order to make textile fibers from polymers comprising polyacrylonitrile.
